Docker

PROFILE

Senior Full-Stack / Backend Engineer with strong experience building and operating scalable SaaS platforms and distributed systems. Specialized in ASP.NET Core, Node.js, React, Next.js, PostgreSQL, and cloud-native deployments, with full ownership of development, DevOps, and production operations. Delivered mission-critical systems across authentication, sports data, and AI-powered automation products. Pragmatic, results-driven engineer with a strong focus on reliability, scalability, and real-world impact.

EMPLOYMENT HISTORY

Lead Engineer, Silyze

Skopje

Mar 2025 — Dec 2025

Served as Lead Developer at Silyze, leading the development of OptaReach and Telentir, two AI-powered SaaS platforms built on a shared stack of Next.js applications and distributed Node.js microservices. Owned end-to-end technical delivery across application development, deployment, and operations, including system administration and infrastructure management on Hetzner Cloud and on-premise environments. Operated scalable, production-grade systems supporting AI-driven marketing automation and conversational voice automation for high-volume, mission-critical workflows.

Co-Founder, SportDevs

Skopje

Jan 2024 — Nov 2025

Co-founded SportDevs, an AI-driven sports data company providing real-time data, odds, and predictive analytics across 20+ sports for sportsbooks, media platforms, and analytics providers. Owned full-stack development using ASP.NET Core, React, Next.js, PostgreSQL, and Tailwind CSS, and handled system administration, DevOps, and CI/CD, including Docker-based deployments, GitHub Actions pipelines, and infrastructure management on Hetzner Cloud. Delivered production-grade, mission-critical data infrastructure for external clients. Company shut down in 2025.

LANGUAGES

Macedonian

English

Senior Web Developer, Silyze

Skopje

Apr 2024 — Mar 2025

Freelance Full-stack Developer

Remote

Mar 2022 — Apr 2024

Worked as a freelance full-stack developer delivering production web applications using React, Next.js, ASP.NET Core, Node.js, PostgreSQL, and Tailwind CSS, with containerized deployments via Docker across AWS ECS/EC2, Hetzner, and Azure.

Software Developer (Part-time), InfiCode

Remote

Feb 2023 — Mar 2023

Continued post-departure in a remote part-time capacity, providing ongoing system maintenance, performance optimizations, security updates, and feature enhancements to support production stability and evolving business requirements.

Back-end Developer, InfiCode

Gostivar

Dec 2021 — May 2022

Designed and implemented the backend and REST APIs for a decentralized blockchain authentication platform using ASP.NET Core (C#) and PostgreSQL, integrating Ethereum, Velas, and other networks, with OAuth 2.0 and OpenID Connect (OIDC) support.

EDUCATION

Computer Science, Faculty of Computer Science and Engineering

Skopje

Oct 2019 — Jun 2021
